Shadows of
a Pre-Renaissance Era

What is the purpose of Art and Creativity in the Pre-Renaissance Era?

For a political renaissance to be truly meaningful,
it cannot remain confined to politics alone.

In relation to the political, economic, and social changes unfolding in the country, we must re-examine the role of creativity and question what form and conceptual direction creative work should take at this moment in time.

What is the role of art, craft, and creativity in a society undergoing political, social, and cultural transformation?

What does it mean to create — **now?**

Sri Lanka's political history has witnessed many periods of conflict and transformation. Yet, during such moments, the creator has often struggled to emerge as an active force shaping the future of the nation.

Shadows of a Pre-Renaissance Era is a reflection on that absence.

This is not to be viewed as an exhibition rooted solely in the practice of pottery. It is an invitation to experience a new way of thinking, creating, and living.

This is not an ending.

It is the still moment before a profound change.

I believe this moment can nurture the creative consciousness necessary for the Renaissance we must collectively achieve.
